Key	Summary	Target deployment date	Release notes	Status

DBU-4526	UTAS PostgreSQL cutover – Master Ticket	27 Dec 2023 - 28 Dec 2023	First Production release for the UTAS Admissions and Scholarships systems in PostgreSQL:
			
			Covers the following deployments:
			
			1. UTAS Admission APPLY deployments and configurations.
			2. Scholarship APPLY deployments and configurations.
			3. UTAS SRP School Portal deployment and configurations.
			4. wUAS, SAMI and call-process deployments and configurations, including:
			  1. Process/jobs that send ARTS requests
			  2. Upload/download, pre-assessment and tracking processes
			  3. Any additional scripts required for UTAS
			  4. Data Warehouse scripts and repointing to Postgres production db.
			  5. Repointing of UTAS iHub reports to Postgres production database and use Postgres scripts to run reports.
			5. UAC webservices API (by which UTAS push student IDs and usernames of offered applicants to the UAC systems).
			6. Data syncing program (to sync reference data from Ingres to Postgres databases).
			7. archive-search program (supporting the archive elastic search functions in wUAS).
			8. UTAS correspondence services (Enquiry Form router, AWS SQS, Enquiry Form microservice, Correspondence microservice).
